#### **THE LATEST NUMBERS: NEW TARIFFS HITTING NEBRASKA ECONOMY HARD**

- According to the most recent data, Nebraska businesses paid \$5.7 million in tariffs on products subject to Trump Administration tariffs in December. That is about 7 times the tariffs paid on those same products in December 2017.
- Since new tariffs were imposed, Nebraska businesses have paid an extra \$22 million in import tariffs.
- Since the trade war began, Nebraska exports have faced \$34 million in new retaliatory tariffs from our trading partners, including \$5.8 million in December. These tariffs make Nebraska less competitive. In December, Nebraska exports subject to retaliation dropped by 72%.

President Trump should successfully negotiate with our trading partners and end these costly and harmful tariffs. Nebraska jobs are on the line.
