THE LATEST NUMBERS: NEW TARIFFS HITTING UTAH ECONOMY HARD

- According to the most recent data, Utah businesses paid \$18 million in tariffs on products subject to Trump Administration tariffs in December. That is about 9 times the tariffs paid on those same products in December 2017.
- Since new tariffs were imposed, Utah businesses have paid an extra \$52 million in import tariffs.
- Since the trade war began, Utah exports have faced \$32 million in new retaliatory tariffs from our trading partners, including \$5.5 million in December. These tariffs make Utah less competitive. In December, Utah exports subject to retaliation dropped by 25%.

President Trump should successfully negotiate with our trading partners and end these costly and harmful tariffs. Utah jobs are on the line.
